Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 8, are rejected under 35 U.S.C. 102(e) as being anticipated by JP 2-156450 (cited by applicant).

Japanese patent disclose means for applying a magnetic field wherein the magnetic field intensity is greater at a portion located away from a portion irradiated by the optical beam of the recording medium and the vicinity along the scanning direction of the beam at the irradiated portion and vicinity.

With respect to claims 5 and 8, as shown in Fig 2 a yoke is asymmetrical and a coil is wound around a plurality of materials having different residual magnetic flux densities in roughly a track direction.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 12-16, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2-156450 (cited by applicant) in view of JP 10-188202 (cited by applicant).

As recited in 102 rejection, the Japanese patent claims the claimed invention except for the cross section of the yoke being made of step shape or wedge shape.

With respect to claims 6 and 16, using a stepped shape or wedge shape (tapered shape) for cross-section of a yoke is well known technique in filed of recording as disclosed in JP-10-188202. Therefore it would have been obvious to one of ordinary skill in the art to use such tapered shape for a yoke as taught by JP-188202 in the yoke used in JP 2-156450.

With respect to claim 12, a magneto-optical recording medium housed in a cartridge is well known feature in art of recording and therefore it would have been obvious to one of ordinary skill in the art to use such well known technique to house the magneto0optical recording medium of JP 2-156450 in a cartridge.

Allowable Subject Matter

Claims 10 and 11 are allowed.

Claims 7, 9, 17 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
